01 THE FIVE AT EACH POSITION

The five U23s at each position, side by side, ordered by overall index from left to right — the gaps between them are usually small. Click a player to open his detail page at the end of the report.

- **C. Brady** (Chicago Fire, aged 22) leads the U23s with an overall index of **67.5** — ranked **#8** among all **38** MLS goalkeepers, any age.
- Only **3** U23 goalkeepers have played more than 500 minutes, and the index here is technical only: SkillCorner does not track goalkeepers.
- Projection to England: **C. Brady** beats the Premier League median most often — **4** of **6** metrics.

Scope. Aged **23 or under** with at least **500 minutes** in MLS 2026. Position = first Wyscout position. Full-backs, centre-backs and wingers are compared with both sides together. Players under **900 minutes** are flagged as **small sample**; players who have left MLS show their current club. **Z. Gozo** (Real Salt Lake) is left out of the U23 lists because he has already been signed by Crystal Palace; he still counts as a league player in the strip plots.

Percentile. On each metric the player is compared with **all** MLS players in the same role, any age; the 90th percentile means he beats 90% of the league.

Indices. Technical = average percentile across the position's technical metrics. Physical = average percentile of PSV-99, sprint, HSR, total distance, high accelerations and high decelerations, averaged over matches of 60+ minutes; requires 3 or more tracked matches. Overall = simple average of the two. Goalkeepers have the technical index only.

England median. Premier League **2025/26** (full season): technical data from the Wyscout base used in the Ranking, 500+ minutes, same position rule; physical data from SkillCorner, by position group (full-back, centre-back, midfield, wide attacker, centre-forward), 3+ matches of 60+ minutes. It is a yardstick, not a forecast: the player is still measured in the MLS context.

Radar. Each axis has its own scale in real values, from the 2nd to the 98th MLS percentile at the position (the numbers on each ring); red is the player, the other colour is the reference; further out is better.

References. Premier League: the club's reference list by position (22/07/2026); for goalkeepers, not on that list, the four with the most prevented goals per 90. Crystal Palace: 2025/26 squad players who play the role. All with 2025/26 Premier League numbers.

Sources. Wyscout, export of 06/10/2026. SkillCorner, MLS 2026, 400 matches from 21/02 to 02/10/2026. Photos: Wyscout and Transfermarkt. Crests: Transfermarkt.
